Q Code 6556 BT Series 2D Bluetooth Barcode Scanner

Application Ability

QC6556 series products, using a 1.2-megapixel level (1280 x 960) optical sensor combined with PRZM intelligent imaging technology, allocate the decoding action to the scan engine, and the decoding chip operates synchronously, thereby shortening the data processing time and speeds up the data collection. Long-distance (6M) or short-distance (4.3cm) reading, wide-angle or narrow-angle field of view, excellent performance with extraordinary motion tolerance and intelligent compensation for decoding poor barcodes, the unique PickList function enables you to It can accurately read the barcodes actually needed, and the automatic decoding ability can work in low light, and it can easily complete the reading task in the environment of poor light.

Unique PickList feature

The patented PickList reading capability enables you to accurately select the barcodes you actually need to read among many dense barcodes. The automatic decoding capability that can work in low light can easily complete the task even in poor light environments.

Barcode Reading Advantages

Omnidirectional scanning capability for unparalleled ease of use, multiple different aimers (LED dot/cross laser/dot laser), read distance options (close, medium, and long-range), micro barcode (4 x 4 mm), high-density barcode (3 mils), DPM barcode, document and image reading.

Q Code 6556 BT Series 2D Bluetooth Barcode Scanner

Convenient system setting and version update capability

Through the online setting program, you can update and upgrade the latest software version of QC6556 at any time, so that your device is always in the latest version. You can also use this program to quickly and easily complete the set requirements of various applications to meet your application process setup!

DPM barcode capture capability (QC6556-DP only)

With powerful intelligent calculation and optical design, the QC6556-DP can capture DPM barcodes of almost any size, surface, different contrast, or high density, including mechanical dot engraving, laser etching, ink coding, and chemical etching, and thermal spraying Type DPM barcode.

Robust and Powerful Efficiency

QC6556 series 2D image barcode scanner is widely used in retail, logistics, express, and industry. Its unique handle design is fully ergonomic and provides users with long-term comfort. And up to 1.5 meters certified drop test, more complete to provide users with reliable usability.

Wide wireless operating range

The QC6556 series Bluetooth scanners provide a connection range of up to 100 meters (straight-line distance, with QC65-BC charging stand or QC65-BD Bluetooth receiver), allowing you to easily scan long-distance tasks with the device

Bluetooth offline access convenience

QC6556 series Bluetooth scanners have built-in time IC (RTC) and offline storage memory, which can faithfully record the time of each reading data. The access memory of up to 8MB can provide you with a storage capacity of about 1 million words (with a 64-bit computer, each word group occupies 8 bytes). Or 7K offline data (each data occupies 150 words, 150 characters or numbers). When you are back within the Bluetooth connection distance, you can automatically or manually

transfer data back or clear data!
